Education

Southern Illinois University Edwardsville

Bachelor of Science in Computer Science, Minor in Mathematics

- GPA: 3.32/4.0 | CS GPA: 3.67/4.0

Fall 2024 – Spring 2027

Edwardsville, Illinois

Southwestern Illinois College

Associate of Arts in Business

- GPA: 3.53/4.0

Fall 2021 – Fall 2023

Belleville, Illinois

Relevant Coursework

- Data Structures & Algorithms
- Operating Systems
- Database & Web Systems
- Statistics for Applications
- Linear Algebra
- Programming Languages

Technical Skills

Languages: JavaScript, TypeScript, Python, C/C++, SQL, HTML/CSS

Frameworks: React, Next.js, Node.js, FastAPI, Tailwind CSS, Streamlit

Tools & Databases: Git/GitHub, Docker, Supabase, Firebase, MySQL, Microsoft Office

Concepts: Object-Oriented Programming, Data Structures, Responsive Web Design, REST APIs

Projects

EZTrader (Futures Trading Journal) | *Next.js, React, TypeScript, Supabase, Python, FastAPI*

- Built a full-stack futures trading journal that imports NinjaTrader and Tradovate CSV exports, with automatic broker detection and duplicate-trade detection for safe re-imports.
- Wrote a Python FastAPI analytics service that computes win rate, profit factor, expectancy, average reward-to-risk, and max drawdown over custom trading periods.
- Built an equity curve, monthly P&L calendar, and filterable trade log with Recharts; added Supabase authentication on PostgreSQL and deployed to Vercel.
- Live Site: eztrader.zachpoettker.com | Code: github.com/zpoettker/EZTrader

WashU Hackathon (AI Investing Education Simulation Platform) | *React, Python, Firebase*

- Developed an interactive trading education and market simulation platform on a 3-person hackathon team.
- Built dynamic trading simulation features including real-time chart interaction, P&L tracking, trade execution logic, and progression-based learning modules.
- Implemented educational trading scenarios focused on risk management, market analysis, and decision-making under simulated market conditions.

AI Job Matching System | *Python, OpenAI API, Adzuna API, Docker, pytest*

- Built a pipeline that fetches software engineering job postings from the Adzuna Jobs API and ranks them against a resume by semantic similarity.
- Embedded job descriptions and resume text with OpenAI's text-embedding-3-small model and scored matches using cosine similarity.
- Wrote preprocessing to strip HTML from postings and extract the relevant resume sections; containerized with Docker and tested with pytest.
- Code: github.com/zpoettker/AI-Job-Matching-System

Experience

E-commerce Business

Founder and Owner

- Founded and operated an e-commerce business serving customers across 40+ countries.
- Generated nearly 250,000 website visits prior to successfully selling the business in 2023.
- Managed website operations, analytics, logistics, and digital marketing initiatives.

Oct 2020 – Jan 2023

Certifications

Anthropic AI Fluency & Foundations Certification

May 2026

Google Web Analytics Certification

Sep 2023
